Summary

Full Stack Developer and Computer Science student with experience building mobile applications, REST APIs and ERP features using React Native, TypeScript and PHP/Laravel. Background in Cypress end-to-end test automation and validation of critical user journeys.

Experience

Grupo Wolf 360 | Full Stack Developer
São Leopoldo, Brazil | Aug 2025 - Present

- Built the company's mobile application from scratch with React Native and developed PHP/Laravel REST APIs to connect the app with backend services.
- Developed an interactive consortium financial simulator that allows users to forecast results for consortium credit letters.
- Implemented ERP modules and campaign platforms to support business workflows and marketing operations.
- Refactored legacy interfaces using Blade, Livewire and Tailwind CSS, and implemented MySQL data integrations.

Testing Company | Full Stack Developer
Novo Hamburgo, Brazil | Mar 2023 - Oct 2024

- Delivered a functional Piccadilly franchise web page in 7 days using PHP/Laravel, receiving positive client feedback.
- Developed Cypress end-to-end tests for enterprise clients to validate critical user journeys, detect UI regressions and reduce manual testing effort.

Skills
